

## Welcome to Practical Systems

Our software products are developed specifically for Australian farmers and cater for all types of farming enterprise. Our business philosophy is to develop comprehensive management solutions that are practical and easy to use and help you maximise profit. Practical Systems products are used by thousands of farmers across Australia.

## What is FarmMap?

FarmMap is a powerful, easy to use mapping software tool designed to take the drudgery out of whole farm planning. Excellent for all property types, FarmMap is suited to all aspects of property planning.

Simply import your farm image file, enter two marker points and you are ready to start planning, with everything automatically created to scale.

FarmMap can import and export shape files, MapInfo and ArcView files Use FarmMap as a stand alone tool or integrate it with Farmbook to provide you with full production management.

As with all Practical Systems products, FarmMap is designed and built in Australia for Australian farmers.

# Why FarmMap ?

## GPS Capable

- Property planning made so simple that you will be an "expert" in no time
- Huge time saving for calculating paddock dimensions, working out fencing needs and poly pipe requirements
- GPS technology now at your fingertips
- Get a better handle on your business by using FarmMap in the integrated mode with Farmbook for all farm data recording including full details on crops, mobs and machinery
- Instantly comply with Government requirements on Property and Vegetation Management Plans

## Features

- Multiple images and unlimited planning layers with a unique system for displaying and selecting layers
- GPS and Arcview (shape file) import and export capability
- Calibrate and display information geographically or by scale
- Calculates areas and distances with the easy-to-use drawing and measuring tools
- Special "planning" layer for crop and grazing rotation planning
- Flexible printing on zoomed areas, selected layers only, or on multiple pages to create wall charts

**System Requirements:**

- PC with Pentium III running @ 400MHz or higher processor
- 126 MB RAM
- 100MB free Hard Drive space
- CD ROM drive
